

# STEEL STRUCTURES BROCHURE

Steel is increasingly popular in construction due to its durability, speed of construction, and design flexibility. We offer a wide range of solutions tailored to both residential and commercial clients

## Residential Applications:

- **Light Steel Framing:** Used for single-family homes, townhouses, and extensions. Offers precision and speed.
- **Modular Homes:** Prefabricated steel modules assembled on-site. Ideal for quick builds and remote locations.
- **Steel Roof Structures:** Lightweight and corrosion-resistant roofing systems.
- **Podium Structures:** Steel frames supporting multi-storey residential buildings above commercial or parking levels.
- **Infill Walling Systems:** Steel panels used between structural frames for insulation and cladding.
- **Balconies and Staircases:** Custom steel designs for aesthetics and strength.
- **Balustrades & Railings**
  - Intricate designs for staircases, balconies, and terraces
  - Can be paired with glass or wood for a modern look
- **Pergolas & Gazebos**
  - Steel-framed outdoor structures with artistic roofing
  - Ideal for gardens, patios, or poolside lounging
- **Canopies & Awnings**
  - Stylish steel-framed covers for entrances or carports
- **Decorative Screens & Panels**
  - Laser-cut steel used for privacy, shading, or wall art
  - Often powder-coated in bold colors or metallic finishes
- **Steel Columns & Beams**
  - Exposed structural elements that double as design features
  - Industrial, rustic, or minimalist aesthetics

# STEEL STRUCTURES BROCHURE

## Common Commercial Applications:

- **Rigid Frame Buildings:** Clear-span structures ideal for warehouses, retail stores, and showrooms.
- **Open Truss Systems:** Used in large halls, sports facilities, and auditoriums for wide open spaces.
- **Office Buildings:** Multi-storey steel-framed structures with flexible floor plans.
- **Mixed-Use Developments:** Combining retail, office, and residential spaces with compatible steel floor grids.
- **Industrial Facilities:** Factories, processing plants, and workshops with custom steel layouts.
- **Agricultural Buildings:** Steel barns, poultry houses, farm animal shelters, feeding pens, green house framing and tobacco curing sheds.
- **Canopies and Shelters:** For parking lots, loading bays, and outdoor commercial areas.
