EXECUTIVE SUMMARY

WealthPride is a multi-disciplinary engineering and construction firm delivering high-performance solutions across four core verticals: general construction, steel structures, agricultural engineering, and industrial and mining mechanical systems. Our operations are rooted in precision, scalability, and durability—engineered to meet the evolving demands of Zimbabwe's industrial landscape. We do not merely build; we engineer environments where productivity thrives and systems endure.

Our core services span across construction, steel fabrication, agricultural engineering, and industrial mechanical systems. Whether it's erecting high-performance steel warehouses, designing irrigation systems for sustainable farming, or installing robust mechanical solutions for mining operations, we deliver with technical excellence and a deep understanding of local needs. Our product suite includes prefabricated steel buildings, conveyor systems, grain silos, and custom-built machinery—all tailored to withstand the demands of Africa's industries.

VISION

To be Zimbabwe's most trusted and technically advanced provider of engineered infrastructure—empowering industries, agriculture, and communities through resilient systems built with pride, precision, and purpose.

MISSION

WealthPride exists to deliver high-performance construction, steel, agricultural, and mechanical engineering solutions through innovation, integrity, and excellence in project execution. We are committed to transforming environments, optimizing productivity, and building infrastructure that stands the test of time.

CORE VALUES

- **Precision** – We engineer every detail with accuracy and technical rigor.
- **Integrity** – We operate transparently, ethically, and with respect for our clients and communities.
- **Innovation** – We embrace technology and forward-thinking design to solve complex challenges.
- **Resilience** – We build systems that endure environmental, operational, and economic pressures.
- **Collaboration** – We believe in the power of multi-disciplinary teamwork and stakeholder engagement.
- **Accountability** – We take ownership of outcomes, time-lines, and quality benchmarks.

GENERAL CONSTRUCTION

Wealthpride executes full-spectrum general construction projects, encompassing site preparation, structural framing, masonry, roofing, plumbing, electrical installations, and finishing works. Our scope includes commercial buildings, institutional facilities, and residential developments. We manage geotechnical surveys, foundation engineering, and reinforced concrete superstructures with precision. From high-density housing units to multi-storey office blocks, Wealthpride integrates local building codes, SADC standards, and sustainable design principles to deliver structurally sound and aesthetically refined outcomes.

Our construction teams are equipped to handle turnkey delivery, including procurement, subcontractor coordination, and quality assurance. We deploy project management software for real-time tracking of time-lines, budgets, and compliance metrics. Wealthpride also specializes in adaptive reuse and renovation of existing structures, integrating modern systems into legacy buildings. Whether constructing a district hospital in rural Zimbabwe or a retail plaza in Harare, our execution is defined by technical rigor, safety compliance, and operational efficiency

Below is an outline of our products and or services with relation to general construction:

Residential Structures

- **Single-family homes**
 - Load-bearing brick walls with reinforced concrete slabs
 - Decorative brick facades and arches
- **Townhouses & Apartments**
 - Multi-story brick buildings with structural or partition walls
 - Brick cladding for aesthetic appeal
- **Boundary Walls & Fencing**
 - Solid brick walls with steel inserts or decorative coping
 - Can include security features like razor wire or electric fencing

Commercial & Institutional Buildings

- **Office Blocks**
 - Brick veneer over steel or concrete frames
 - Exposed brick interiors for industrial aesthetics
- **Schools & Clinics**
 - Brick classrooms and treatment rooms with high thermal mass
 - Easy-to-maintain surfaces and sound insulation
- **Retail Shops**
 - Brick storefronts with large display windows
 - Often combined with steel roofing and signage frames

GENERAL CONSTRUCTION

Utility & Infrastructure

- **Water Reservoirs & Tanks**
 - Brick-lined underground tanks with waterproofing
- **Public Toilets & Ablution Blocks**
 - Brick walls with ceramic finishes and steel roofing
- **Pump Houses & Generator Rooms**
 - Secure brick enclosures with steel doors and ventilation grills

Other Infrastructure

- **Aluminium & Glass Cubicles and Office Buildings**
 - Hybrid structures built with or inside brick buildings
- **Retaining Walls**
 - Brick walls with reinforced concrete footings
- **Garden Walls & Planters**
 - Brick structures with ornamental patterns or mosaic inlays
- **Outdoor Kitchens & Braai Areas**
 - Brick counters, fire pits, and pizza ovens with steel grills

Finishing Works (*Internal & External)

- **Plastering**
 - Application of mortar to walls/ceilings for smooth or textured surfaces before painting or cladding.
- **Painting**
 - Decorative and protective coating applied to plastered walls, ceilings, steel, or wood.
- **Paving**
 - Installation of concrete, stone, or brick surfaces for walkways, driveways, or patios.
- **Fencing**
 - Erection of barriers using wire, steel, timber, or masonry to define property limits or enhance security.
- **Walling**
 - Construction of standalone walls for privacy, security, or soil retention—can be masonry, precast, or reinforced concrete.

GENERAL CONSTRUCTION

STEEL STRUCTURES

Wealthpride leads Zimbabwe's steel structure construction sector with precision-engineered solutions for warehouses, factories, and agricultural sheds. Our modular steel designs are optimized for rapid deployment, seismic resistance, and load-bearing efficiency, making them ideal for both urban and rural applications. With in-house fabrication and certified welding teams, they ensure structural integrity from truss to cladding. Projects like the Chitungwiza Agro-Processing Depot and the Bindura Logistics Hub showcase their ability to deliver scalable, corrosion-resistant builds that meet international standards. Wealthpride's steel division is the go-to for clients demanding speed, strength, and long-term value.

Commercial Steel Structures

1. Design & Engineering

- Structural modeling using CAD Software
- Material selection: H-beams, C/Z purlins, RHS and more.

2. Fabrication & Assembly

- CNC cutting, MIG/TIG welding, galvanizing
- Pre-assembly of trusses and frames
- Bolt-on site erection with crane support
- Roof and wall cladding: color steel, sandwich panels

3. Ancillary Systems

- Rainwater harvesting and guttering
- Thermal insulation and ventilation
- Fireproofing and corrosion protection

4. Applications

- Warehouses, Industrial Plants, hangars, agro-processing plants
- Tobacco grading sheds and curing barns
- Logistics terminals and industrial parks

Residential clients often seek steel structures that blend **security, style, and durability**—and steel delivers on all fronts. Here's our list of popular **decorative and security steel installations** that we offer:

STEEL STRUCTURES

STEEL STRUCTURES

Security Steel Structures

- **Steel Gates & Fencing**
 - Custom designs with laser-cut patterns or ornate scrollwork
 - Sliding, swing, or automated options
- **Security Grilles & Burglar Bars**
 - Fixed or retractable designs for windows and doors
 - Powder-coated finishes for rust resistance and style
- **Steel Doors**
 - Reinforced entry doors with decorative panels
 - Fire-rated and burglar-proof options available
- **Perimeter Walls with Steel Inserts**
 - Concrete or brick walls topped with steel spikes or mesh
- **Garage Doors**
 - Roll-up or sectional steel doors with locking systems

Decorative Steel Structures

These elevate the home's visual appeal while often serving functional roles.

- **Balustrades & Railings**
 - Intricate designs for staircases, balconies, and terraces
 - Can be paired with glass or wood for a modern look
- **Pergolas & Gazebos**
 - Steel-framed outdoor structures with artistic roofing
 - Ideal for gardens, patios, or poolside lounging
- **Canopies & Awnings**
 - Stylish steel-framed covers for entrances or carports
- **Decorative Screens & Panels**
 - Laser-cut steel used for privacy, shading, or wall art
 - Often powder-coated in bold colors or metallic finishes
- **Steel Columns & Beams**
 - Exposed structural elements that double as design features
 - Industrial, rustic, or minimalist aesthetics

AGRICULTURAL ENGINEERING

WealthPride empowers agricultural productivity through advanced engineering systems tailored for Zimbabwe's diverse farming landscapes. Our services include the design and installation of center pivot and drip irrigation systems, grain silos, mechanized feed systems, climate-controlled livestock housing, sheds, farm-houses and workshops and other related infrastructure. These solutions are engineered to optimize water usage, reduce post-harvest losses, and enhance operational efficiency across smallholder and commercial farms.

Hybrid Agricultural Infrastructure

- **Livestock Shelters**
 - Open-sided steel barns with adjustable ventilation
 - Elevated steel platforms for poultry or piggery
- **Grain Silos & Feed Storage**
 - Corrugated steel silos with aeration systems
 - Modular steel bins for bulk feed
- **Machinery Sheds**
 - Large-span steel structures with roller doors
 - Can include solar panels on roof
- **Greenhouses & Shade Nets**
 - Steel frames with UV-resistant covers
 - Climate-controlled options for horticulture
- **Irrigation Infrastructure**
 - Steel pivot sprinkler systems across large fields
- **Cold Rooms & Packhouses**
 - Insulated steel panels for temperature-sensitive produce
 - Integrated with refrigeration and sorting equipment
- **Farmhouses & Worker Housing**
 - Brick walls with steel trusses and corrugated roofing
- **Storage Sheds & Granaries**
 - Brick base with steel-framed roofing for ventilation
- **Animal Shelters**
 - Brick pens for pigs, goats, or poultry with steel mesh partitions

AGRICULTURAL ENGINEERING

In agricultural engineering, Wealthpride brings deep expertise in designing and constructing tobacco farm infrastructure tailored to Zimbabwe's climate and production cycles. From flue-curing barns with optimized airflow systems to grading sheds and bulk storage units, their builds enhance post-harvest efficiency and leaf quality.

Tobacco Farm Infrastructure

1. Curing Barns

- Twin-Turbo, Rocket Barn, and Tunnel Barn designs
- Heating systems: coal, LPG, biomass
- Ventilation control and insulation systems
- Structural steel framing and brick cladding

2. Grading & Storage Facilities

- Mechanized grading lines with conveyors
- Moisture-controlled bulk storage units
- Solar-powered lighting and ventilation
- Security fencing and access control

3. Irrigation & Water Systems

- Drip and pivot irrigation setups
- Borehole drilling and pump installation
- Water harvesting tanks and filtration systems

4. Farm Infrastructure

- Access roads, culverts, and drainage
- Staff housing and ablution blocks
- Perimeter fencing and security lighting

MECHANICAL ENGINEERING

Wealthpride's mechanical engineering scope includes the design, fabrication, and installation of conveyor systems for mining, agro-processing, and manufacturing sectors. Their capabilities span belt conveyors, screw conveyors, bucket elevators, and pneumatic transfer systems. Using software simulations, they optimize throughput, load capacity, and energy consumption. Systems are built with stainless steel frames, variable-speed drives, and automated control panels for precision handling.

Installation includes alignment calibration, sensor integration, and safety interlocks. Wealthpride also offers retrofitting services—upgrading legacy systems with modern automation and dust suppression modules. Their scope covers maintenance protocols, operator training, and spare parts provisioning.

Industrial Mechanical Infrastructure

1. Conveyor Design & Simulation

- Belt, screw, bucket, and pneumatic systems
- Throughput modeling using simulation software
- Load sensors, speed controllers, and PLCs

2. Fabrication & Installation

- Stainless steel frames and rollers
- Motorized drive units and tensioning systems
- Dust suppression and safety interlocks

3. Maintenance & Retrofit Services

- System diagnostics and performance audits
- Replacement of worn components
- Automation upgrades and energy optimization

4. Sector Applications

- Mining: coal, chrome, gold ore handling
- Agro-processing: maize, tobacco, soybeans
- Manufacturing: packaging, assembly lines
